

Tool Set Up

HR Control Tool 26.27

To control and regulate membership database, control local system and trackers integration and measure MXP funnel

To start up this tracker, please fill in the below information

Organization in

Required Spreadsheet Integration

Trackers Name	Links
Membership Database	
HR Control Tool	
Spring Recruitment	
Fall Recruitment	

Remark: LCVP PM should set permission on this tab to prevent any unexpected damage to the tracker

TAB	DESCRIPTION	NOTE
MX Dashboard	MXP Funnel Analysis	*Change only the month filter
HR Dashboard	Detailed HR Overview of the entity	*Is auto-updated, any issues please find EST PIC to amend
Summer/Winter ADV	Recording ADVs of membership going for higher role	
MX Analytics	Detailed status of each members	
Attendance	Membership attendance in LC activities	*Only edit column P to Y, and do not edit the shaded column
[Database 1.0] Name	Summary of membership details	
[Database 2.0] Membership	Membership Database Form

MX Funnels	Description
Leads (LEAD)	- Refers to the number of people who intend to apply for specific positions or joining AIESEC - An important indicator if the talent pool is enough to fulfil into needed position or if should we find more potential talents They are considered as a LEAD when: ✓ They show the interest for the higher position / role (through national surveys or different official platforms / for advancement phase) ✓ We know where are they to attract & nurture (sign up on aiesec.org or specific CSRM platform) ✓ In some case, we have basic information of them (referrals)
Applied (APP)	- Refers to the number of people who officially submit the application for the desired position They are considered as #APPLICANT when: ✓ They begin any first stage of the recruitment process
Accepted (ACC)	- Refers to the number of people who get the acceptance for the position / role they applied They are considered as ACCEPTED when: ✓ They go through the selection process and meet the criteria that have been set, as well as be allocated into their suitable position in the structure (applicable for both recruitment and advancement phase) ✓ If they fail to join AIESEC / the position, they will considered as #REJECTED status
Approved (APD)	- After getting the acceptance for the role, this people need to go through a preparation process to get ready for the role - This indicator can tell us whether the #Ideal HR for the organisation can be fulfilled or not They are considered as APPROVED when: ✓ They are ready to start the realisation phase (ready to perform or commit, ready to engage and develop leadership with AIESEC) ✓ The first MX Standard has been delivered to them
Realised (RE)	- Refers to the number of members who started their membership experience - In MXP, a member could have more than one Realisation at the same time (depending on how many positions they get accepted) - The Realisation timeline is the base for PM function to calculate and plan for all activity timeline of the MX Operation Note: - <i>REALISATION is counted by the first day of work of the member (the first practical activity done in the role covered - receiving capacity building is not considered the first day of work)</i> Remarks: ✓ When is the peak of Realisation and we can do backward planning to calculate when is the peak of Applicant - Accepted - Approved ✓ Based on each duration and the start date of Realisation, we can predict the peak of Finish and Complete to have a proper plan preparing for recruitment & Closing MX Standard delivery ✓ Each stage's experience would contribute and boost the other stages. in the end it would contribute to the total experience of the member ✓ MX Standards need to be delivered to the members in order to make this cycle happen ✓ Failure in delivering a good engagement - performance support - development path for member could lead to #BREAK-RE, which links to both the retention rate and the talent pipeline situation of the entity, at the same time create strategy on how to improve them

Advanced (ADV)	- Refers to the talent pipeline of the entity and predicts the number of LEADs in the next cycle of allocation They are considered as ADVANCED when: - The member has been accepted for a higher / new role - The member is reterming in a leadership position / role (e.g. Team Leader, Director, Manager, LCVP, LCP, EST, MC) <i>Note:</i> - It doesn't mean they will always become the #LEAD, because they can become #LEAD for other positions in other entities, LCs etc. (depending on their development in AIESEC) - If a member finishes its cycle, and wants to reterm in the same role or within the same function, it is not considered as advanced - in this case from finished / completed the funnel will start back from approved (in case of changing area or realised)
Finished (FI)	- Refers to the number of members who finish the minimum duration of their membership experience, also defined by their last day of work (end term) <i>Note:</i> - If they BREAK-APD or BREAK-RE or take a gap in the RE and cannot fulfil the minimum duration, they should be counted as TERMINATED instead and cannot be counted as COMPLETED or ALUMNI
Completed (CO)	They are considered as COMPLETED when a member is: - Finished the membership status on EXPA - Fulfil the LDA survey - The mandatory MX standards are delivered (survey on platform - feature come in the future) Until the survey is not present of the platform, the member is still considered as COMPLETED if they fill the national closing survey and have debriefed their experience with their direct TL
Alumni (ALU)	- An alumnus is someone who has done with the AIESEC experience and had spent the minimum possible time (finished) in their membership experience - If the members are terminated from a position / role for (insert reasons) such person will not be considered as an alumnus of said entity or team Some development opportunities can be introduced after their membership journey: ✓ BD partner opportunities ✓ Joining another ELD or engaging in EwA activities ✓ Introduce to AIESEC alumni network

[1] if matching of month of exit date with column month (?) + exit status

[2] need to change method of aiesec opportunities joining collection

[3] Not collected in membership database form

[4] can i used date difference hm

[5] add filter
add lc

[6] can put into MCQ
