Branch POSITIONING OF [HQ]

***the size of the bubble in the scatter charts below refers to MDI Score

Q3 LC/OE POSITIONING OF AIESEC IN MALAYSIA

Q4 LC/OE POSITIONING OF AIESEC IN MALAYSIA

CLUSTER SYSTEM

We group entities into clusters based on their **ODI Index Training Requirements**, which is calculated from three components: **XDI**, **HDI**, and **MDI**. The aggregated ODI index allows us to place each entity into a cluster (group of peers with similar needs, strengths and gaps). This clustering not only enables our targeted, benchmarking, and tailored support, but also helps us identify cluster-level gaps. By addressing these gaps through focused coaching, we can guide each group and eventually move up to the next cluster.

CLUSTER 1	CLUSTER 2	CLUSTER 3	CLUSTER 4	CLUSTER 5	ENTITY	August				CLUSTER	September				CLUSTER	October				CLUSTER	November				CLUSTER	December				CLUSTER	January				CLUSTER

TIERING SYSTEM

It is a **grouping method** used to **classify entities** based on their **product performance**. For each product, a **maximum benchmark** metric is set (e.g., number of approvals, realizations, or completions). Each entity's results are then compared to this maximum and translated into tiers (levels) that reflect their relative performance.

It is a **grouping method** used to **classify entities** based on their **product performance**. For each product, a **maximum benchmark** metric is set (e.g., number of approvals, realizations, or completions). Each entity's results are then compared to this maximum and translated into tiers (jewels) that reflect their relative performance.

TIERING MONTHLY RESULTS

* the APD is accumulated from one month to another (which means September = Aug + Sep & October = Aug + Sep + Oct ...etc)
